Summary

Final-year B.Tech Computer Science (AI & ML) student with a strong foundation in SQL, software development lifecycle (SDLC), and web technologies (HTML, CSS, JavaScript, jQuery). Experienced in building and testing full-stack applications with Python, FastAPI, and Java/Spring Boot, with hands-on exposure to REST APIs, debugging, and QA practices including test plan development (Pytest, JUnit). Strong analytical and communication skills, with experience translating requirements into working solutions in agile, product-driven teams.

Education

Sreyas Institute of Engineering and Technology **2023 – 2027**
Bachelor of Technology - Computer Science And Engineering (AI&ML); CGPA: 9.06 *Telangana, India*

Experience

Swecha **May – July**
Intern *Telangana, India*

- Built TextBrief, an end-to-end Python NLP text summarization tool using Hugging Face Transformer models (BART), delivering context-aware abstractive summaries on long-form input.
- Deployed as an interactive Streamlit web app; demonstrated to 50+ users across internship sessions with real-time inference on variable-length documents.
- Optimized Hugging Face inference pipeline for throughput and summary quality — reduced redundant tokenization steps, benchmarked output against input length thresholds and 88% modal accuracy.

Evoastra **February – April**
Intern *Telangana, India*

- Built a real-world Supply Chain Demand Prediction System enabling businesses to forecast sales demand in real time, powered by three machine learning models with a Python FastAPI backend and Streamlit frontend.
- Participated in requirement gathering, testing, and validation phases across the SDLC, ensuring data accuracy through reporting and QA checks.

Technical Skills

Languages:	Python, Java, C
Python & Backend:	FastAPI, REST APIs, JWT, OOP & Software Design Principles
Web Technologies:	HTML, CSS, JavaScript, JQuery, TypeScript, Spring Boot, Spring Security
Databases:	SQL, MongoDB, Supabase
Tools:	MS Office Suite (Excel, Word, PowerPoint),Git, GitHub,Swagger UI, Docker, Vercel
Testing :	Quality Assurance, Test Plan Development,Pytest, JUnit 5

Projects

Smart Blog Editor | *Python, FastAPI, MongoDB, JWT, Gemini API* **Github**

- Developed a production-grade full-stack blog platform with a Python FastAPI backend and React + Lexical rich-text editor frontend; secured with JWT auth and MongoDB persistence.
- Integrated Gemini API for AI-assisted content generation with streaming responses; added slug generation, indexed queries, and a DELETE endpoint across 35+ REST endpoints.
- Configured CI/CD via GitHub Actions with 14 Pytest tests using mongomock; deployed on Vercel with pydantic.

Moodify — Music Recommendation Based on Mood | *Flask, Whisper, Librosa, Spotify API, MySQL* **Github**

- Built a multi-modal mood-detection application in Python, combining Whisper speech transcription and Librosa audio-feature extraction to infer user mood.
- Integrated Whisper for speech recognition and the Spotify API to deliver personalized and an end-to-end pipeline from raw audio input to feature extraction, mood inference, and recommendation with MySQL for persistence.

Event Verse | *React, TypeScript, Supabase, Stripe* **Github**

- Built a full-stack event ticketing platform with React 18 + TypeScript and Supabase (PostgreSQL + Auth + Realtime), supporting interactive seat map selection with live availability updates.
- Integrated Stripe payment processing via a Supabase Edge Function, keeping secret keys server-side; implemented client-side PDF ticket generation with unique booking ID stamping.

Achievements

- Solved problems on LeetCode across Trees, Binary Search, strengthening algorithmic problem solving skills.
- Secured 1st place out of 300+ teams at HackFest, designing and deploying a full-stack web application under a 24-hour time constraint.
- Organized the SDG technical event and led developer workshops reaching 800+ attendees across multiple sessions, managing end-to-end event like Client and service orientation.
- Represented college in Cricket, Volleyball, and Kabaddi at competitive inter-collegiate events.
