Summary

Final-year B.Tech Computer Science (AI & ML) student (Class of 2027, CGPA 9.06) with a strong foundation in data structures, algorithms, object-oriented design, and complexity analysis. Experienced building, testing, and debugging full-stack and backend systems in Python, FastAPI, and Java/Spring Boot, with hands-on exposure to REST API design, relational and NoSQL databases, and QA practices (Pytest, JUnit). Comfortable translating ambiguous requirements into working solutions in agile, product-driven teams.

Education

Sreyas Institute of Engineering and Technology **2023 – 2027**
Bachelor of Technology - Computer Science And Engineering (AI&ML); CGPA: 9.06 *Telangana, India*

Experience

Swecha **May – July**
Software Development Intern *Telangana, India*

- Designed and built TextBrief, an end-to-end Python NLP text-summarization pipeline using Hugging Face Transformer models (BART), applying model evaluation and complexity trade-offs to deliver context-aware abstractive summaries on long-form input.
- Deployed as an interactive Streamlit web app; demonstrated to 50+ users across internship sessions with real-time inference on variable-length documents.
- Optimized the Hugging Face inference pipeline for throughput and quality — reduced redundant tokenization steps and benchmarked output against input-length thresholds, achieving 88% modal accuracy.

Evoastra **February – April**
Software Development Intern *Telangana, India*

- Built a real-world Supply Chain Demand Prediction System enabling businesses to forecast sales demand in real time, powered by three ML models behind a Python FastAPI backend with a Streamlit frontend.
- Participated in requirement gathering, system design discussions, testing, and validation across the SDLC, ensuring data accuracy through structured reporting and QA checks in an agile team.

Projects

Smart Blog Editor | *Python, FastAPI, MongoDB, JWT, Gemini API, Docker* **Github**

- Designed and built a production-grade full-stack blog platform (35+ REST endpoints) with a FastAPI backend and React + Lexical rich-text editor frontend, applying OOP and modular software design principles; secured with JWT auth and MongoDB persistence.
- Configured CI/CD via GitHub Actions with 14 Pytest tests using mongomock; deployed on Vercel with Pydantic-validated schemas and indexed queries for low-latency reads.

TaskTrackr - Task Manager REST API | *Java, Spring Boot, JPQL, RBAC, JWT* **Github**

- Built a full-stack task management REST API with Java and Spring Boot, implementing JWT-based authentication, role-aware CRUD endpoints, pagination, and Swagger-documented API contracts.
- Service layer with unit and integration tests with JUnit5 and Mockito to validate service-layer logic and auth flows, following clean, reusable code practices.

Event Verse | *React, TypeScript, Supabase, Stripe* **Github**

- Built a full-stack event ticketing platform with React 18 + TypeScript and Supabase (PostgreSQL + Auth + Realtime), supporting interactive seat map selection with live availability updates.
- Integrated Stripe payment processing via a Supabase Edge Function, keeping secret keys server-side; implemented client-side PDF ticket generation with unique booking ID stamping.

Technical Skills

Languages:	Python, Java, C
Core CS:	Data Structures & Algorithms, Object-Oriented Design, Complexity Analysis, REST API Design
Backend:	FastAPI, REST APIs, JWT, Spring Boot, Spring Security
Web:	HTML, CSS, JavaScript, jQuery, TypeScript, React
Databases:	SQL, MongoDB, Supabase (PostgreSQL)
Tools:	Git, GitHub, GitHub Actions, Swagger UI, Docker, Vercel
Testing:	Pytest, JUnit 5, Mockito, Test Plan Development, QA

Achievements

- Solved problems on LeetCode across Trees, Binary Search, strengthening algorithmic problem solving skills.
- Secured 1st place out of 300+ teams at HackFest, designing and deploying a full-stack web application under a 24-hour time constraint.
- Organized the SDG technical event and led developer workshops reaching 800+ attendees across multiple sessions, managing end-to-end event like Client and service orientation.
